From:

• Soonchan Kwon (182575@jnu.ac.kr)

- Gihwan Kim (201701981@o.cnu.ac.kr)
- Nahyeong Kim (nhkim5697@o.cnu.ac.kr)
- Nawon Kim (201600@jnu.ac.kr)

Summary

- Conducted the communication quality measurement field experiment.
- Conducted the drone detection test.
- Made a final presentation.

What BTT completed this week

- Soonchan Kwon
 - Played a role as GCS, which is the role of checking whether node 2 and node 3 communicate well, led the experiment, and oversaw the experimental equipment, in the first and second communication quality measurement field experiments.
 - Organized and analyzed the results from the field experiment.
 - Found a problem with the network code and modified the code to obtain better results in the second field experiment.
 - Prepared presentation materials and wrote a script about the system overview and problems and challenges of the network part.
 - Annotated and organized the code implemented in the network part.
- Gihwan Kim
 - Played a role in storing and initializing the log value of node 3, in the first communication quality measurement field experiment.
 - Conducted drone detection experiment and organized the result.
 - Modified the size of the code to be small to run the program on the board.
 - Prepared presentation materials and wrote a script about experiments and problems and challenges of the detection part.
 - Annotated and organized the code implemented in the detection part.
- Nahyeong Kim
 - Wrote the part of communication quality test in the paper.

- Wrote the part of the power consumption test in the paper.
- Modified the paper by reflecting the feedback.
- Played a role in storing and initializing the log value of node 2, in the first and second communication quality measurement field experiment.
- Researched on the equation to calculate the receive sensitivity.
- Made the question list to prepare the final presentation.

• Nawon Kim

- Played a role as an observer and provided experimental photographs and experimental assistance, in the first communication quality measurement field experiment.
- Played a role in storing and initializing the log value of node 3, in the second field of communication quality measurement.
- Prepared presentation materials and wrote a script about the introduction.
- Made the question list to prepare the final presentation.

Things to do by next week

- Submit a draft of a paper.

Problems or challenges

- Run the program that combines network part code and detection part code on the board.
- Felt difficult to respond to variables that occurred during the field experiment.
